

# TESTING MADE EASY

## R6500 Electrical Receptacle Analyzer

Featuring the NEW Report Generator™ Software for Windows®

*A fast labor saving way to meet code requirements*

*Maintain utility systems for proper working order*

*Why* should you invest in an Electrical Receptacle Analyzer?

Decreases testing time by 50% or more!

Saves Money

Promotes Patient and Staff Safety

**NST Analyzers** do not require special skills or training. Virtually anyone can perform tests with minimal instruction.

**All NST tests** are automatically recorded, eliminating errors in reading, posting and entering results.

- Performs 12 different safety tests in just 2 seconds!
- Records and stores up to 2,200 receptacle tests in memory.
- Each receptacle is coded for identification and location.
- Identifies outlets and circuits in need of attention.

**JCAHO** Reports Automatically

When testing is completed, data can easily be downloaded to an IBM® or compatible PC. The reports are recognized by JCAHO and NFPA.

Specifications on reverse

## SPECIFICATIONS

Mode of Operation

Automated Testing and Data Collection

Tests Performed

Standard "OKX" Test to Check Receptacle Wiring Polarity  
Isolated Power Wiring  
Line Voltage  
Phase Relationship Between Receptacles  
Neutral-to-Ground Voltage  
Neutral-to-Ground Resistance  
Ground-to-Ground Voltage  
Ground-to-Ground Resistance  
Contact tension (Gripping Force) of Hot, Neutral and Ground Prongs

Weight

In Use: Analyzer, Test Probe and Reference/Power Cord - Approx. 3 lbs.  
In Storage: Analyzer, Complete with Case - Approx. 13 lbs.

Size

Analyzer: 8 1/2" W x 2 1/2" H x 7 3/4" D  
Storage Case: 18" W x 5 1/2" H x 14" D

Power

Line Voltage - 115 VAC: Frequency - 60 Hz.

Other

Camera-Style Neck Carrying Strap

Accessories

Standard: Analyzer-to-Computer Cable, Report Generation Software (IBM®- PC Compatible), Storage Case

With the purchase of the R6500 Electrical Analyzer, NST offers a one year warranty on all parts and labor.

We are proud of the quality and accuracy of our analyzers. They are calibrated to NIST traceable standards before they leave our warehouse. Each NST analyzer comes with a 30-day limited money back guarantee.
